## Mac Notes App Not Loading Icloud Notes

Notes are now synced and updated to Mac and other iOS devices SEE ALSO:How to Fix OS X Yosemite Shutdown Problems.. Solution 3:-Unselect notes in iCloud preferences It will delete all local copies of the iCloud notes.. SEE ALSO :MacBook Running Slow, fixSolution 2 :-If you want to solve this issue, delete the iCloud account on your iMac and recreate it.. Then logout Log in again Recheck Notes sync and open Notes If this method is not working, restart your phone.. Go to Settings -> iCloud and turn on Notes Wait a few minutes Now open notes app.

Some times Mac users faced this issue Any note created on Mac appears on iPhone and iPad via iCloud.. Then go to iCloud preferences and select notes again Solution 4:-In your iOS device, go to System Preferences -> iCloud and un-check Notes Sync.. Solution 5:-In your iPhone 6, go to Settings -> iCloud and turn off Notes Then turn off phone.. Solution 1:-Go to Settings -> Notes -> Default Account -> ( change this to) iCloud.. But notes created with iPhone and iPad not appear on Mac To sync notes,If you want to enable notes for your each account, in your iPhone or iPad, go to Settings -> Mail, Contacts, Calenders or Go to Settings -> iCloud.. Turn on again Open Notes app and check notes None there That's good All notes suppose to be stored in iCloud.
